PROFILE

I am an LLM technician and React Developer with a (BSc) Mathematics and Computer Science from Aberystwyth University. Over the past two years, I have successfully delivered high-impact AI and development projects while working remotely and internationally.

Working for Data Annotation remotely with flexible hours has allowed me to spend the last few years living outside of the UK. I have spent extended periods in Riga in Latvia, Tokyo, Vietnam and closer to home in Edinburgh. Now permanently settled in the UK I am eager to transition and commit to a permanent software development role.

I am a hardworking, creative, adaptable, enthusiastic and professional individual with experience in Python, specifically Langchain and LLM integration management.

In addition to my British passport I hold a Netherlands passport which enables me to live and work in Europe without requiring a visa.

EDUCATION & QUALIFICATIONS

Aberystwyth University - Bachelor's degree in Mathematics and Computer Science 2.2 2019-2023

Parrswood Sixth Form - A Levels - Mathematics, Computer Science 2017-2019

St Bedes College - 10 GCSEs (5 A's, 5 B's) 2012-2017

TECHNICAL SKILLS SUMMARY

Programming & Tools:	Python 3.x, FastAPI, BeautifulSoup, Powershell, HTML, JavaScript, Node.js, MySQL, MongoDB
LLM Management and Development:	LangChain, RAG, Prompt Engineering, Huggingface, Model Fine-tuning, Custom Agents, Vector Databases, AI red-teaming, Model Safeguarding, Cursor
Management	Agile Methodology, Scrums, Jira Web
Development:	React.js, Node.js, HTML, CSS, Supabase, Hosting (Render, Github)
Other:	Microsoft Office, Finance APIs

WORK EXPERIENCE

Data Annotation	Sep 2023 – Nov 2025
AICHATBOT Project: Optimized PyQT6 code generation capabilities, enhancing the AI's ability to produce functional and well-structured GUI code.	

- **Beryllium Image Vision Project:** Processed images to the AI. Validated and refactored AI-image extracted technical code to ensure high-quality, executable outputs.
- **Raven Teaching AI:** Undertook the development of **React script library** code generation, expanding the AI's proficiency in modern front-end frameworks.
- **NEXO Project:** Engineered complex **JSON rubrics** and metrics to evaluate code generation quality; performed rigorous code audits and remediated non-compliant scripts to meet technical standards. Performed demanding complex discrete code evaluations consistently.
- Undertook extensive model testing for the CURSOR IDE.
- **ASGARD Project:** Validated AI data analysis responses. Introduced additional data analysis tasks to the AI for the project.
- Conducted rigorous peer code reviews to ensure technical accuracy, performance, and adherence to project standards

Aberystwyth Pier	Sep 2019 – Jun 2022
Bar work – part time job whilst studying	

Food Sorcery	Sep 2018 – Jun 2019
Kitchen portering at cookery school – gap year work	

Maths tutoring	Sep 2018 – Jun 2019
Tutoring individual students in preparation for maths GCSE	

INTERESTS

I enjoy playing and watching football, I am a member of tennis club and play regularly, I also enjoy chess and take a keen interest in politics.
